What is the standard voltage for a power socket in Cuba?

All power sockets in Cuba provide a standard voltage of 110V with a standard frequency of 60Hz. You can use all your equipment in Cuba if the outlet voltage in your own country is between 100V-127V. This is mostly the case in the US, Canada and countries in South America. The standard frequency in Cuba is 60Hz.

Do I need a power adapter in Cuba?

If you are visiting Cuba from the United States, you should bring a power adapter because US Type A or B outlets may not be readily available. If your device runs on 110 volts or is dual voltage, and the plug fits in a Cuban power outlet, it will work without a plug adapter in Cuba.

What type of power plug is used in Cuba?

In Cuba, power plugs and sockets (outlets) of type A, type B, type C and type L are used. The standard voltage is 110 / 220 V at a frequency of 60 Hz. Cuba, a Caribbean island nation, is known for its vibrant culture, stunning beaches, and fascinating history.
