

# Georgia Civilian Solar Power Generation System

What is Georgia Power's simple solar program?

Georgia Power's Simple Solar program allows all customers to support and foster the growth of solar energy by enabling Georgia Power to purchase and retire Renewable Energy Credits (REC) generated from solar energy resources.

What is Georgia Power's community solar program?

Georgia Power's Community Solar program gives you the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar facilities. You then receive energy credits on your monthly bill based on the solar facility's production.

Do all solar facilities belong to Georgia Power?

Not all solar facilities you may come across belong to Georgia Power. We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia.

Does Georgia have solar?

Want Solar? Sunlight is one of Georgia's most abundant resources with an average of 218 sunny days per year. More than 3,000 MW of solar resources, or approximately 12% of our total capacity\*, generate significant carbon-free energy for Georgians during sunny, daylight hours.

Where is Georgia's largest solar power plant located?

The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia. Other facilities add carbon-free energy to the grid and supply renewable energy in support of our Community Solar program. 1. North Georgia

How many PPAs are there in Georgia?

The five PPAs were selected by Georgia Power following a competitive solicitation overseen by an independent evaluator and PSC staff. The facilities will be located throughout Georgia and include: Mitchell County: A 25-year PPA providing 260 MW of solar capacity. Coffee County: A 30-year PPA providing 200 MW of solar capacity.
