

Installing new photovoltaic panels is cheap

How much does it cost to install solar panels?

It costs around \$30,000 to install solar panels. That's a big number, but incentives usually lower it significantly. The average U.S. solar shopper needs about 11 kilowatts (kW) of home solar to cover their electricity usage.

What should you look for when buying cheap solar panels?

Here are the four main things to look for when shopping for cheap solar panels: Cost per watt: It's easy to get distracted by the total price of a solar system, but the number you should focus on is the cost per watt.

Are solar panels cheaper than a professional installation company?

Yes and no. Solar panel kits are much more affordable than having a professional installation company install a solar array for you. However, affordability upfront isn't the only factor. Trying to take your home off-grid is a huge task that most people, frankly, aren't up to.

How do I finance my solar panels?

Many top solar companies, like Blue Raven Solar, offer other ways to finance your solar panels, including power purchase agreements (PPAs) or some combination of a solar lease and solar loan. A PPA is similar to a solar lease, only an energy company owns and installs the panels, and you pay for the energy produced.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a solar inverter cost?

Inverter: A solar inverter converts the generated DC electricity into AC electricity that can be used to power your home. The cost of an inverter depends on its size and efficiency, but these devices typically cost between \$1,000 and \$3,000. **Mounting system:** This is what holds rooftop solar panels in place.
