

# Romania s new wind power energy storage project

Will wind farms increase power supply in Romania?

Wind farms could contribute with 13 GW to the national power generation capacity by 2020. Between 2009 and 2017, total wind farm capacity will comprise 4,000 MW with investments of US\$5.6 billion. Additionally, potential offshore wind farms may increase supply.

How will the EIB support a new wind farm in Romania?

The European Investment Bank (EIB) is committing up to EUR30 million to a major wind-power project in Romania, accelerating the country's green transition and energy independence. The EIB support will co-finance a planned second onshore wind farm in Pestera, a village near the city of Constanta on Romania's Black Sea coast.

When did Romania start using wind power?

Wind power in Romania started in 2009 with an installed capacity of 14 MW. As of the end of 2016, the total cumulative installed capacity had increased to 3,028 MW.

Will Romania support offshore wind power in 2020?

Romania passed a law in November 2020 to support offshore wind power. The Black Sea 1 farm is planned with a capacity of 500 MW and Black Sea 2 farm is planned for 1,400 MW to be built in 2027-28. By 2021, wind power had risen to 17% of total installed power generation capacity and 13% of total power generation.

Will CIP expand its presence in Romania's energy transition?

"Beyond that, we look to expand CIP's presence in Romania's energy transition with further investments." CIP is the world's largest dedicated fund manager for greenfield renewable-energy investments, with expertise in offshore and onshore wind, solar photovoltaic (PV), biomass and other forms of sustainable energy.

In April, Romania's largest battery storage system, of 24 MWh, was put into operation. It is the first phase of a project totaling 216 MWh. The ...

The developer has 5 GW of wind and solar power projects in the pipeline in Romania. It provides turnkey services for designing, developing, ...

A subsidiary of Monsson Group has submitted a proposal for a major battery energy storage project in Romania, seeking an environmental permit for a facility with a ...

Prime Batteries, a company supported by InnoEnergy, and Monsson have put into operation the largest electricity storage capacity in Romania. This is part of the first hybrid ...

# Romania s new wind power energy storage project

A subsidiary of Nova Power and Gas, part of the E-INFRA group, is on track to secure authorization for the construction of Romania's largest energy storage facility in Floresti, Cluj.

The Energy Strategy of Romania 2025-2035, with projections up to 2050, is the first strategic document of its kind that the government in Bucharest adopted in 17 years, the ...

Romanian electricity producer Hidroelectrica has signed a contract with Prime Batteries Technology and Enevo Group to install a Li-ion battery storage system at the Crucea ...

The company aims to build a multi-gigawatt portfolio of wind, solar and energy storage across Central and South Eastern Europe, taking ...

Romania's wind power sector is rebounding, with over EUR 1 billion in new projects, including KKR and Greenvolt's 250 MW Ialomita wind farm. These projects will add ...

The European Investment Bank (EIB) is committing up to EUR30 million to a major wind-power project in Romania, accelerating the country's ...

In another interesting collaboration, Prime and Simtel aim at increasing energy efficiency, reduce costs, and accelerate the implementation of sustainable projects, both in ...

In a comprehensive analysis, Transelectrica urged the authorities to support large-scale energy storage projects, especially for pumped storage ...

On the cusp of a major renewables overhaul. Romania's new wind and solar subsidy auctions could revitalize the country's renewable energy sector after ...

Romania is one the EU Member States with the highest natural potential in terms of renewable energy sources. Given Romania's balanced energy mix and technological developments in the ...

Romania considers launching new wind auctions 26 August 2025 - Two weeks ago, the authorities conducted the country's second wind and solar power auction for ...

3 days ago&#0183; The Ministry of Energy and Natural Resources of Turkey issued a public call for solar and wind power auctions for 2 GW in total. It will receive the applications on November 4 and ...
